* **Definition of an event.** The number of events which have taken place is useful in forecasting take up and determining trends. It is important, therefore, to ensure that, as far as possible, data is consistent, accepting that some (e.g. events for trikes only) may marginally distort the results..

Please take, as a standard, the event that is open to any, or most categories. If the handbook shows a series of events for separate categories but which, in all other respects (e.g. course; start time) is the same as another shown in the handbook as 1 event, **count them all as 1 event.** Otherwise, take each event listed in the handbook as 1 event
